Leaching was the main topic of discussion at this meeting!

We discussed the process of leaching and various solutions. With the main item of discussion being— “Where can we find the chemicals needed?” If you know of a local or a place within Alaska they can be purchased, please let us know.

There are many different kinds of leach. It is important that you realize that certain leaches work better on different kinds of ore and carbon depending on what other elements are included in the ore complex.

For more on leaching check out the article “How To Make Your Own Leach” on our website at www.gpaakenaichapter.com

We are still looking for items we can use to hold a Chinese Auction to make money for the club, so we can hold more activities.
